Background:

The Conservation Reserve Enhancement Program (CREP) is a partnership between the U. S. Department of Agriculture (USDA) and the State of Washington that began in 1998. Under CREP, private agricultural landowners in eligible geographic areas are provided with incentives to restore and improve salmon and steelhead habitat. Eligible areas are those that contain salmon or steelhead species listed under the Federal Endangered Species Act. Landowners who enroll in CREP voluntarily remove lands from production and grazing under 10-year or 15-year contracts. Landowners then plant trees and shrubs to stabilize stream banks and serve other ecological purposes. In return, landowners get an annual rent, incentive and maintenance payments, and cost-sharing for these installations. Twenty-seven counties in Washington contain eligible lands and streams.

The Continuous Conservation Reserve Program (CCRP) is a federal stream rehabilitation program similar to CREP but is applicable to geographic areas that do not contain federally-listed endangered species.

The Conservation Assistance Revolving Account (CARA) is a dedicated, appropriated account initially capitalized by the 2004 Legislature with a \$500,000 capital budget appropriation. Administered by the Conservation Commission through local conservation districts, the purpose of CARA is to provide financial assistance to landowners enrolled in CREP. Ninety percent of a landowner's costs of installing streamside improvements are reimbursed by the USDA and the other 10 percent is reimbursed by the Conservation Commission. However, the USDA cannot issue reimbursements until the projects are complete. The CARA funding bridges the financial gap between the time that the landowner invests in restoration installations and the time federal reimbursement is received.

Summary of Substitute Bill:

The CARA may be used only to make loans to landowners for projects enrolled in the CCRP and the CREP.

Appropriation: None.

Fiscal Note: Not requested.

Effective Date: The bill takes effect 90 days after adjournment of session in which bill is passed.

Testimony For: (Economic Development, Agriculture & Trade) House Bill 1461 expands the use of CARA to cover lands enrolled under the Continuous Conservation Reserve Program, which is similar to CREP. The Conservation Commission will use the same procedures as they do under CREP to administer this expanded authority.

Testimony For: (Capital Budget) House Bill 1461 expands the reimbursement program to include the CCRP. This would bridge the up to three year time lag between landowner investment in stream restoration and reimbursement from the U.S. Department of Agriculture. This would allow non-listed streams to receive these bridge loans.
